ABOUT MYSELF

A creative front-end developer with over 2.5 years of experience in the web development industry, I specialize in creating engaging and user-friendly web experiences. My expertise includes React, JavaScript, HTML, CSS, etc. I thrive on turning complex challenges into seamless solutions and am committed to continuous learning and innovation.

WORK EXPERIENCE

🏢 *Special Team* – lattakia, Syria

City: lattakia | **Country:** Syria

Front-end developer

[15/07/2023 – Current]

- Implementing various website designs using the appropriate technology for the project requirements.
- Implementing different control panels without having a specific design, relying on libraries such as Material UI and Tailwind.
- Collaboration with the team to discover new technologies that we need in projects and working to understand them accurately and providing a detailed explanation to the relevant direction like Amaduse technology.
- Communicating with other directions such as UI/UX and backend to discuss the design, endpoints, and everything we need to discuss before or during work.
- Planning and setting a complete policy for training new people in Directions from the initiation mechanism to the acceptance stage to start actual work in the team.

🏢 *Matrix ERP L.L.C* – Tartus, Syria

City: Tartus | **Country:** Syria

Front end developer

[01/11/2024 – 05/12/2024]

- Implementing various website designs using the appropriate technology for the project requirements.
- Testing the dashboard for all aspects of design and user experience, ensuring that the API functions properly.
- Currently suspended due to company operations being frozen due to the situation in the country.

🏢 *Focal X agency* – lattakia, Syria

City: lattakia | **Country:** Syria

Front-end developer

[11/11/2022 – 10/10/2023]

Successfully completed a structured training program in front-end UI development, which included both the Foundation and Advanced levels:
Achieved a 94% score in the beginner level and 84% score in the advanced level.
Designed and developed a variety of websites using front-end technologies suited to each project's specific requirements.
Collaborated closely with UI/UX designers, back-end developers, and other team members to ensure seamless integration and development workflow.
Took on administrative and supervisory responsibilities, including:
Supervising and reviewing assignments submitted by trainees in the beginner levels.
Managing and tracking the progress of trainees' final graduation projects.
This training provided both technical growth and leadership experience within a collaborative team environment.

VOLUNTEERING

[23/01/2025 – Current] syria
Her Initiative (Training Supervisor)
- Supervising several diploma programs and workshops by recording attendance, following up with trainees, and encouraging their participation through a point-based system.
- Organizing and managing trainee data using dedicated Excel sheets for each diploma or training program.
- Developing organizational, communication, and data management skills through continuous coordination and monitoring.

[05/2024 – 08/2024] syria
Youth 4 H&N (Youth Challenge for Health and Technology) (supervisor front-end)
- **About the Challenge:**
  - Youth Challenge for Health and Technology organized by the Hand in Hand and Hope projects of the Department of Ecumenical Relations and Development and the Anis Saadeh Angelic Association in cooperation with UNICEF
  - challenge to build a professional mobile application for pregnant and lactating women to support their health and the health of their children.
- **My missions:**
  - definition the basic needs of the project with the concerned associations.
  - setting up the form for the initial test of people applying to participate in the challenge, and finally I worked on selecting people from the applicants to nominate them for the final interviews.
  - Presentation a lecture with my colleagues in which we explained some of the basic specifications of the application in addition to the technical requirements, and we implemented the presentation using the Canva website.
  - Supervised and help the youth in the front-end development department to build a control panel for the application using React and Tailwind.
